About Alpeco

Alpeco has long been acknowledged as the UK's leading supplier of tanker metering and associated loading and unloading equipment for the downstream petroleum distribution market.

With over 40 years' of identifying and meeting the needs of this complex industry we know that your business depends upon getting maximum usage and efficiency from your tanker fleet and equipment. That's why safety, reliability and excellent after sales service are always foremost in our thinking for the systems and equipment that we provide.

After becoming a member of the successful Flowmax Group in 1997, Alpeco's product portfolio was further strengthened by the acquisition of Action Technical Products – manufacturers of the excellent Perrett range of Tanker Fittings and Actiman Bottom Loading equipment.

In addition to our extensive range of road tanker products, Alpeco are also able to offer a range of depot equipment such as bottom loading skids, depot intake meters, loading arms, transfer pumps, truck meters, chemical and stainless-steel meters, industrial flow meters and LPG flow meters.

Details of our product range, technical drawings and FAQs can be found on our website – alpecold.com
